1 Position the back plate as needed for the medium, large or x-large canister (see back chart for proper hole location) by pulling the spring button out from behind. Slide the plate to the desired location and release the button.

2 Position the front plate in the same way as the back plate. See Page 2 for proper position.

3 Mount the wall plate in desired location (screws not supplied). Use anchors or screws that are compatible with the wall material or other hard surface.

4 To install the canister into the bracket, position the bottom in first with canister lid in open position, rotate can/lid to hook the hinge of the canister lid under the spring pin.

5 When assembled correctly the completed bracket should look like the example in figure 5.

6 Optional: For added security, attach a plastic zip tie around the lid's hinge and through 2 holes above the spring pin as shown in figure 6.
SANI-BRACKET® 3-IN-1 CANISTER HOLDER ADJUSTMENT GUIDE
FOR DETERMINING PROPER HOLE LOCATION AS REQUIRED FOR DIFFERENT SIZE CANISTERS

MEDIUM CANISTER (135 WIPE COUNT)

LARGE CANISTER (160 OR 220 WIPE COUNT)

EXTRA LARGE CANISTER (50, 65 OR 100 WIPE COUNT)

FOR MOUNTING TO A ROUND POLE

1. Mount the 3-in-1 Canister Holder to a round pole by first sliding its back plate down to its lower position. This will expose the top four holes. Insert four of the 8-32 machine screws provided through the top four holes of the Back Plate.

2. Align the holes in the Sandwich Plate (the one without nuts) with the machine screws and slide it up in back of the 3-in-1 Canister Holder.

3. Position that assembly in front of the pole you wish to mount to with the machine screws straddling the pole.

4. Position the Round Pole Back Plate to the back side of the pole with the "V" facing backwards. Trap the pole within the "V". Align the machine screws to the holes in the Round Pole Back Plate and tighten firmly.

FOR MOUNTING TO A SQUARE POLE

1. Mount the 3-in-1 Canister Holder to a square pole by first sliding its back plate down to its lower position. This will expose the top four holes. Insert four of the 8-32 machine screws provided through the top four holes of the Back Plate.

2. Align the holes in the Sandwich Plate (the one without nuts) with the machine screws and slide it up in back of the 3-in-1 Canister Holder.

3. Position that assembly in front of the pole you wish to mount to with the machine screws straddling the pole.

4. Position the Square Pole Back Plate (the one with nuts) to the backside of the pole. Align the machine screws to the holes in the Square Pole Back Plate and tighten firmly.
