MATERIAL SAFETY DATA SHEET - EMU OIL

Description: A semi-solid white to yellow mass at 20 degrees C; at 60 degrees C it becomes somewhat clear, slightly yellow tint, liquid.

Boiling Point: 335 - 360 degrees C
Water Content: 0.03% - 0.70%

Flash Point: 320-330 degrees C
Solubility in Water: Insoluble

HAZARD INFORMATION - Health:

Emu oil has no known adverse health effects, is not a known ocular irritant, is not a primary dermal irritant, and is not a known toxic substance to rats. Emu oil is an all natural, food by-product substance.

PRECAUTIONS:

- There are no known threshold limits for Emu oil.
- Ventilation: There are no known precautions required under normal conditions.
- Inhalation: Emu oil does not present any inhalation hazard under normal conditions.
- Personal Protection: Not required under normal conditions.
- Flammability: Under 140 degrees C, Emu oil is not considered combustible.

SAFE HANDLING INFORMATION:

Transport & Storage: Emu oil should not present problems with transportation or storage. It should not be transported or stored with toxic substances, flammable materials, explosives, oxidizing materials or spontaneously combustible materials. Keep containers sealed tight to prevent contamination. Store in cool areas, using light inhibiting containers.

Spill & Disposal: Keep spill contained using absorbent materials such as sand, pig blankets, or sawdust. Clean up and seal in labeled containers for disposal. Clean area with water. Waste materials may be incinerated under controlled conditions as/where permitted. Check local waste management regulations in your area for other approved methods.

DISCLAIMER: Desert Palms Emu Ranch accepts no liability for loss or damage suffered as a consequence of reliance on information contained herein. All reasonable care has been taken to insure the above information is accurate at time of printing.
