

For Better Tattooing

NEO-CARTRIDGES

Developed by:

Ink Machines
For better tattooing

Advantages of Neo-Cartridges

Hygiene

Neo cartridges are made with a one-piece medical polymer body that connects to the tattoo machine. This eliminates the need of potentially fragile seals. The Homogeneous cartridge body makes it the safest needles on the market regarding cross contamination when handled correctly.

Healing

Magnetic bond between the tattoo machine and the needle. The non-physical contact creates an ideal link between the machine and skin. Smooth operation and excellent healing.

Organizing

The magnetic properties of the Neo cartridge makes it stick to magnetic metal. This allows the user to organize the needles in a orderly manner while working.

Less strain on the machine

Neo cartridges offer very little resistance when compared to cartridges with membrane and rubber band retention. Starts up and runs effortless from 6 volts regardless of the protrusion of the needle.

Models

Available sizes 0.30/#10 and 0.35/#12 in various tapers.

	Round RL/RS (Liner & Shader)	Magnum RM/MG (Curved and Straight)
