

Every other time you switch needles, apply a small amount of lubricant to the needle plungers; this will help keep the machine well lubricated.

Additional Tips:

The Peak Kyan Pen can be wipe-cleaned using disinfectant wipes such as Madacide.

The Kyan Pen grip is autoclave-safe. Please do not autoclave the machine body and motor.

It is recommended that the screws are lubricated with Vaseline or synthetic grease/oil before the grip is screwed back onto the machine body.
