

"...it works  
like magic!"

**PLATINUM  
ROSE**

*"...taking the nonsense out of skin care".*

## How to properly use and utilize all the benefits of Platinum Rose Advanced Skin Care.

Platinum rose Advanced Skin Care has multiple uses. This product is a dense butter with a very high viscosity.

One of the most important rules whenever applying for any type of Platinum Rose Skin Care use, you must always remember a **little bit goes a long way!**

The makeup of this formula allows for rapid healing on eczema, rash, burns, poison ivy, cuts, tattoos, scars, wrinkles plus so much more. Some say it is magic, realistically it simply replenishes important vitamins, minerals and vital nutrients that were lost during trauma. This also applies to your hair. Hair, it is a major part of your skin too and like your skin it requires valuable vitamins plus nutrients to grow healthy. Soften up your beard even or use as an alternative to pomade and other hair products!

Tattoos:

- Washing the tattoo regularly twice a day with an antimicrobial soap, build a lather, rinse thoroughly, repeat a couple times. Apply a small amount enough needed when massaging the tattooed area until almost gone and fully absorbed into the skin. You should only see a very mild sheen on the skin. If the skin looks too shiny or glossy you have applied too much and with a clean sterile paper towel remove any excess. Repeat only a couple times a day for 4-6 days. After, you may apply Platinum Rose Skin Care Lotion or Skin Hydrator.

Hair:

- After washing hair, towel dry. Hair should be subtly damp. Mix a small amount of Platinum Rose in both hands vigorously until melted. Apply to hair, mixing throughout hair with your hands. Depending on amount or length of hair apply more than once and evenly. Product will soften hair and relax tension in the hair including frizz. The hair will absorb the nutrients throughout the day and will not leave the hair greasy.

Rash/Poison ivy/Burns:

- Always make sure all wounds are clean first and washed properly with antimicrobial soap. Apply small amounts to the area of the skin irritation. Massage thoroughly until product vanishes. Apply 2-3 times a day or as needed. Expect redness, inflammation and swelling to begin to clear up. Once the area begins to show signs of settling minimize times per day until gone.

#### Cuts/Scrapes:

- Clean all wounds appropriately with antimicrobial soap and remove any dirt or debris within the cut before applying. Be careful when applying to areas that have surgical tape, stitches, staples or any other medical wound repair in order to safely not ruin or accidentally removing the medical applied dressing. Apply gently with sterile applicator such as tongue dispenser, cotton ball, or Q-tip. Apply as needed throughout the day. Always replace and renew any bandages after new application. Consult your physician if you have questions or concerns.

#### Scars/Wrinkles:

- Scars and wrinkles take more time so be patient. Applying the product 1-2 times a day to the damaged area of skin. Thoroughly massage a small amount of product into the skin until absorbed. For best results apply on a long-term schedule, 2-6 months depending on the severity of the damaged skin, wrinkles, stretch mark, scar, etc. In some cases, only minimum results will occur if the skin is too heavily damaged and broke down from age, poor health, liver functions and or other medical conditions that limit your body's potential to heal.

#### Skin hydration treatment:

- To optimize the Platinum Rose Skin Care product's potential and the health of your skin you can use as soaking hydrator. This is very relaxing and beneficial to the skin. Simply add 1-2 tablespoons to a tub full of hot water. *(Make sure to test the temperature of water first before getting in)!* Hot water helps the pores to open. After applying 1-2 tablespoons of Platinum Rose Skin Care product to tub full of hot water allow a couple minutes to dissolve. Enter tub and soak from 20-45 minutes or until water cools. You can soak longer if desired, as this is up to each individual person's tolerance.

### Disclaimer

**Please note for those with food allergies. Read all ingredients before use. If you have any concerns of possible skin reactions apply in a small area, with a small amount. Look for signs of allergic reactions, irritations, or redness caused by an allergic reaction. If irritation or reaction does occur wash immediately with warm water and soap. Discontinue use and consult your physician before continued use.**

**In some cases, over use or over application of this product can clog pores and cause bacteria to be trapped if not used properly or thoroughly washing the area, along with poor exercising of adequate hygiene. This may cause an area of skin to show signs of pimple like break outs due to the high Oleic fatty acid content. Use less, massage into the skin completely until vanished and wash the area of skin with warm water and soap regularly!**

**This product is food grade organic and although edible we do not recommend it; it is an acquired taste.**

**Please enjoy.**
