

ISO test results Bio/dermalanchor Polymer

Summary results for [REDACTED] :

The test article was steam sterilized. The testing was conducted in July & August of 2008.

ISO Test Method	Test Description	Result/Comments
10993:5: 1999	Cytotoxicity using the ISO elution method	The product is considered non-toxic.
10993:10: 2002	Maximization Sensitization with normal saline extract	Product did not elicit a sensitization response.
10993:10: 2002	Maximization Sensitization with cottonseed oil extract	Product did not elicit a sensitization response.
10993:10: 2002	Intracutaneous Reactivity with normal saline extract	Product is considered a non-irritant.
10993:10: 2002	Intracutaneous Reactivity with cottonseed oil extract	Product is considered a non-irritant.
10993:11: 2006	ISO Acute Systemic Toxicity Study with normal saline extract	No signs of toxicity and no excess weight loss were observed, indicating that it met the product met the requirements of this ISO test.
10993:11: 2006	ISO Acute Systemic Toxicity Study with cottonseed oil extract	No signs of toxicity and no excess weight loss were observed, indicating that it met the product met the requirements of this ISO test.
